# Wireless Offices

## DATA SHEET

DigitalAir Wireless have a variety of business solutions to help you business install a wireless network. Some of the many advantages of a wireless network for your business are:

- The ability to be mobile throughout your premises whilst still connected.
- Your visiting customers are able to connect to their own networks securely and with minimum effort.
- You can rearrange your office space at any time losing the need to re-wire your desks.
- A massive saving on initial installation of CAT5 cabling.

### Mobility

Simply having the flexibility of being able to move around your offices or campus gives employee's more of a relaxed and comfortable working environment, aiding productivity.

### Security

Your corporate wireless network can be as secure as you require. DigitalAir Wireless supply the latest wireless hardware which is all compatible with 802.11i security standard.

### Network Implementation

Our experienced wireless network installers will work with you to install your wireless network with little or no disruption to your business. We always aim to have no network down time or to slow company productivity whilst installing. We can perform on "OTJ" training (On the job) for wireless network users and dedicated training for network engineers, empowering them to reliably manage your wireless network when we have completed our work.

If you are interested in an Wireless Security Audit please give us a call.
