# Wireless Residential Property

## DATA SHEET

Are you a property developer looking to give your property that extra edge for the professional home?

DigitalAir can install a wireless network throughout your developments to further increase the resale value and make the property more appealing. From single homes to luxury apartment blocks we have experience of installing the right solution for your development. The advantages of installing a wireless network into your luxury development is:

- More and more people now work from home, so having a wireless network pre-installed is an advantage in its own right.
- Its not just a business tool, the wireless home was a vision of the future which has now come upon us. Wireless DVD players, wireless XBox, wireless music streamers, together with laptops and PC's all have wireless built in as standard!

Create a flexible work and play environment as your wireless network will reach far out in the garden, through your garage and to the back of your property.

If you are interested in an Wireless Residential Solution please give us a call.
