

Wireless Security Consultancy

DATA SHEET

Tel: 0845 095 9434
Email: sales@digitalairwireless.com
Floor 1, 213 Lower Blandford Road
Poole Dorset BH18 8DN

WIRELESS BRIDGES

Secure links
Fast throughput
PtMP, PtP and Pt2P

NETWORK DESIGN

Security 802.11i
Data speed
Reliability

NETWORK INSTALL

Experienced Installers
Minimum down time
802.11t

SECURITY TESTING

Full security testing
Ensure your security
WEP, WPA, 802.1X, 802.11i

HOTSPOT SOLUTIONS

Offer internet access for visitors
Attract more business visitors
Increase your company profile
Retain 100% of revenue!

Is your wireless network as secure as you think? Are you "leaking" your wireless signal outside of your premises allowing hackers to easily perform simple hacks such as network packet sniffing or denial of services attacks (DOS). Is all of your wireless data encrypted or could you be suffering from rouge access point within your wired network? DigitalAir can survey your current wireless network and search for weaknesses within your security.

Wireless networking technologies provide convenience and mobility, but they can also introduce security risks on your network if not properly designed. For example, unless authentication and authorization mechanisms are implemented, anyone who has a compatible wireless network adapter can access your network. Without encryption, wireless data is sent in plaintext, so anyone within sufficient distance of a wireless access point can detect and receive all data sent to and from a wireless access point.

DigitalAir can help you with your wireless security policy, help you design a secure network or help you test your current wireless network.
